PROFILE

Results-driven Software Engineering undergraduate specializing in backend and full stack development with strong expertise in ASP.NET Core (.NET), C#, Spring Boot, and Node.js. Proven ability to design and deliver scalable RESTful APIs, real time systems, and secure applications using modern architectures and JWT based authentication. Experienced in building AI integrated solutions leveraging TensorFlow and OpenAI APIs. Demonstrated impact through projects like real time transport systems and AI powered platforms, alongside a published research contribution (ICSD 2026). Strong foundation in Clean Architecture, MVC, and Agile practices. Passionate about engineering high quality software and eager to contribute as a Software Engineering Intern.

EDUCATION

B.Sc. Honors in Software Engineering (Reading) Sabaragamuwa University of Sri Lanka Current GPA: 3.74 / 4.00	2023 - 2027
Diploma in HRM LPEC Campus Kiribathgoda Merit Award	2021 - 2022
Physical Science Stream Bandaranayake Central Collage-Veyangoda, Sri Lanka	2012 -2021

WORK EXPERIENCE

Intern Hatton National Bank PLC Pugoda, Sri Lanka	Aug 2022 - July 2023
---	----------------------

PROJECTS

Gemora – AI Powered Digital Gemstone Trading & Auction Platform Third Year Project Group Frontend Developer UI/UX Designer AI Integration React, React Native, Spring Boot, MySQL, TensorFlow, Python	GITHUB DEMO
- Developed responsive and scalable frontend interfaces using React.js and React Native (Expo) for a real-time gemstone trading and auction platform. - Designed complete UI/UX in Figma, improving usability, user flow, and overall user experience. - Integrated AI-based features including gemstone analysis and chatbot using TensorFlow and Gemini API. - Consumed RESTful APIs built with Spring Boot and managed state using Zustand, ensuring efficient data handling and real-time updates. - Implemented key modules such as auctions, dashboards, and marketplace features following reusable component architecture.	
TransitPulse – Smart Public Transport Overcrowding Predictor Full Stack Developer Ongoing ASP.NET Core Web API (.NET), C#, Entity Framework Core, PostgreSQL, SignalR, JWT Authentication, Next.js, Gemini API (LLM), RAG Architecture	GITHUB
- Built a real-time transport crowd tracking system using ASP.NET Core Web API (.NET) and SignalR - Developed secure REST APIs with JWT authentication and PostgreSQL integration - Implemented AI-powered RAG-based assistant to generate insights from live transport data. Enabled users to receive intelligent recommendations on crowd levels and best travel times - Followed clean architecture and scalable backend design principles.	
ISH Cosmetics – Full-Stack E-Commerce Platform Personal Project Full-Stack Developer React.js, Node.js, Express.js, MongoDB, JWT, Supabase, Tailwind CSS, Vercel, Render	GITHUB DEMO
- Developed a secure and scalable full-stack e-commerce platform for online cosmetics shopping. Built responsive frontend with React.js and Tailwind CSS for optimal mobile and desktop performance. - Implemented RESTful APIs with Node.js/Express.js for product management, order processing, and user authentication. Enabled secure authentication with JWT, bcrypt hashing, and Google Login integration. - Developed admin dashboard for product, order, and user management with role-based access control. Integrated Supabase Storage for efficient product image management and seamless frontend-backend communication.	
PawTrack – Street Pet Reporting & Adoption Platform Personal Project Full-Stack Developer Next.js, TypeScript, FastAPI, PostgreSQL, Tailwind CSS, Google Maps API, Chatbot, UI/UX	GITHUB DEMO
- Developed a full-stack platform to report, locate, and adopt street pets, improving accessibility in animal welfare. - Built responsive UI with Next.js, TypeScript, and Tailwind CSS for enhanced usability and performance. Implemented RESTful APIs with FastAPI and PostgreSQL for secure data management of pets and users. Integrated Google Maps API for location-based reporting and visualization of street pets.	

- Developed a rule-based chatbot (PawBot) to assist users and improve platform navigation. Implemented secure authentication to protect adoption actions and user data

Email_MS – University Project Management System | Academic Project | Group Leader | [GITHUB DEMO](#)

Fullstack Developer | API Development | Deployment | Node.js, Express.js, MongoDB, React, Tailwind CSS, AWS EC2, NGINX

- Developed a web-based university project management system requested by academic staff to streamline communication and project coordination between students and lecturers.
- Designed and implemented RESTful APIs using Node.js and Express.js for handling user management, messaging, and project workflows.
- Deployed the backend on AWS EC2 with a Node-compatible environment and configured NGINX as a reverse proxy for secure and scalable production deployment.
- Ensured efficient data handling and storage using MongoDB with structured schema design

TECHNICAL SKILLS

- **Programming Languages** — TypeScript | JavaScript | Java | C | Python | SQL | C#
- **Frontend** — React.js | Next.js | TailWindCSS | React Native(Expo) | HTML/CSS | Three.js
- **Backend** — Spring Boot | Express.js | Node.js | Fast API | ASP.NET Core Web API(.NET)
- **Databases** — MySQL | PostgreSQL | Supabase | MongoDB
- **Cloud & Devops** — Docker | Git/GitHub
- **Concept and Practices** — MVC Architecture | Clean Architecture | RESTful APIs | OOP | Agile | CI/CD
- **Tools** — Jira | Postman | Figma
- **AI & Automation** — NumPy | Pandas | TensorFlow | LLM Integration (Gemini/OpenAI) | Retrieval-Augmented Generation (RAG) | Prompt Engineering

SOFT SKILLS

Analytical Thinking | Communication | Collaboration and Teamwork | Attention to Detail | Problem Solving | Adaptability | Creativity and Innovation | Interpersonal Skills

VOLUNTEERING

Secretary - Present

IEEE WIE Student Branch Affinity Group Sabaragamuwa University of Sri Lanka [LINK](#)

Vice Secretary- 2024-2025

IEEE WIE Student Branch Affinity Group Sabaragamuwa University of Sri Lanka [LINK](#)

Technical Team
